

Expiry Management is a user-friendly and efficient expiry date checking solution designed specifically to streamline the process of checking products with expiration dates.

With Expiry Management, teams will save time, reduce food waste, maximize profit margins and enhance the customer experience by offering only the freshest products possible. Say goodbye to manual date checking and hello to efficient and accurate end-of-life grocery store operations!

Features

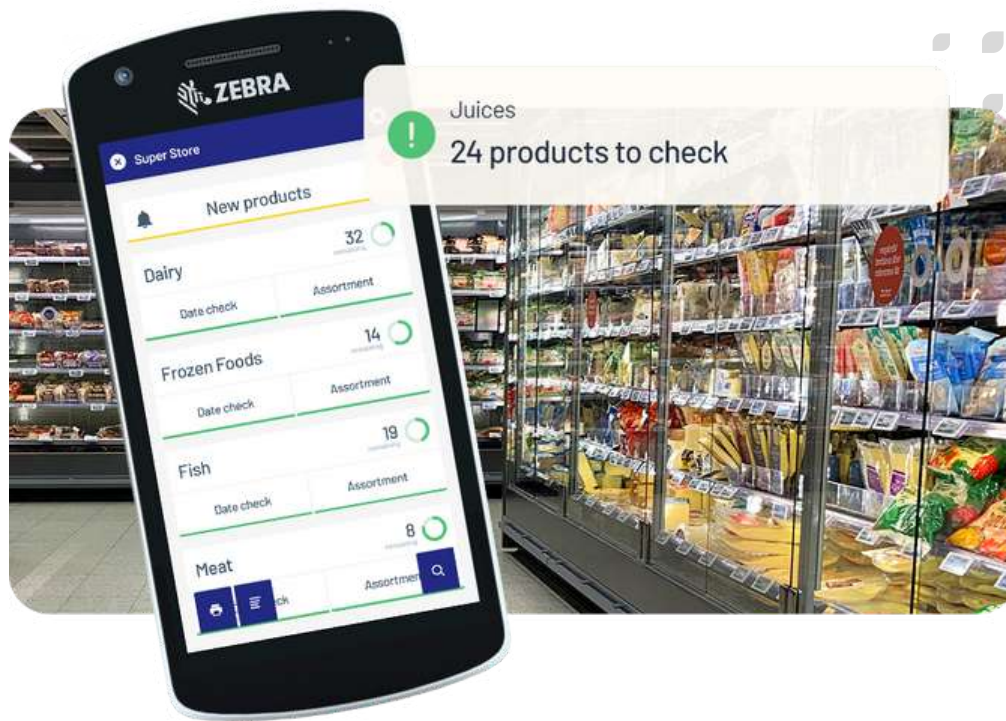

1 Daily Prompts for Daily Checks
Users receive a daily round of products to check in their department. The list is optimized to only display items that require attention that day.

2 Cross-Functional Collaboration
Products are categorized by department allowing for multiple departments to use the system at the same time, all at once.

3 Quick and Actionable UI/UX
Users are prompted with items to check and actions (such as markdowns) to execute. If items have been sold or are out-of-stock, users are asked to enter the next shortest expiration date or mark the item as sold.

4 Layout Optimization
Daily checklists are mirrored to the digital layout of the store, sorting all checks in the most efficient way.

Benefits

- 1 Reduce time checking products with expiration dates
- 2 Reduce food waste due to human errors or missed products
- 3 Maximize profit margins by quickly catching products near expiry
- 4 See immediate results in labor efficiency, food waste, expiration management and quality assurance.

70% less time spent checking dates

40% reduced food waste

Positive results from day 1

Be the Best in Fresh!

With a combined 500+ years of Freshology™ experience, the heritage of Invafresh has enabled fresh food retailers to create extraordinary store operations performance and differentiated customer experiences. As the leader of Freshology, Invafresh is deployed in over 350 grocery retailers spanning a global reach of 35 countries with more than \$100 million of Fresh revenue being transacted daily, to provide AI/ML demand forecasting, merchandising, replenishment, sustainability and compliance, and waste prevention solutions.
