

Grocery retailers are facing production planning challenges due to changing demand and labor shortages. Built on an innovative and intuitive mobile-centric user interface, Invafresh's Fresh Retail Platform automates production planning for grocery retailers by providing real-time updates to plans based on critical in-store data, such as inventory and demand, enabling retailers to accurately forecast labor requirements to optimize limited resources and changing consumer demands.

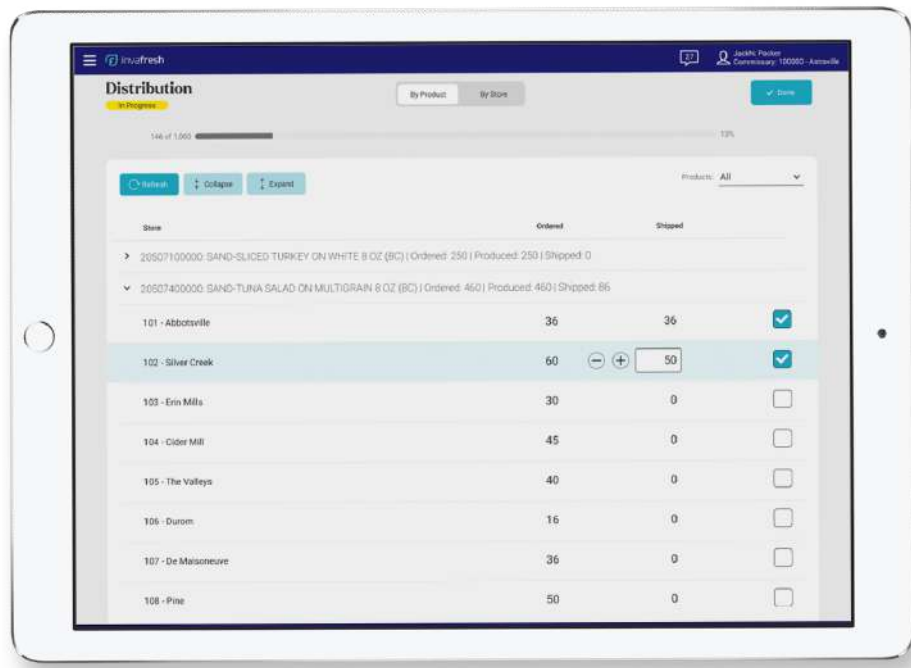

With Invafresh Commissary Fulfillment, grocery retailers can add a layer

of intelligence and automation to their production planning, which is known to be both complex to forecast and scale, while also being labor intensive. Invafresh removes the complexity of in-store and commissary production planning as our Fresh Retail Platform is purpose-built for grocery retailers.

Learn how Invafresh Commissary Fulfillment can optimize your fresh grocery operations by delivering real-time visibility and control over your fresh inventory.

Features

- 1 Centralized Production Planning**
Extend your in-store production planning support to your commissary operations, providing you with a centralized approach to recipe management, quality control, pricing, sourcing, nutrition labeling, and other activities.
- 2 Run Multi-Production Cycles Per Day**
Create auto-generated pick lists that can be used by multiple employees simultaneously for products made in-store or at a commissary to maintain the freshest stock possible.
- 3 Demand Driven Replenishment**
With demand driven replenishment capabilities, gain real-time data into fresh inventory balance on-hand quantities at the store level to ensure the most accurate production recommendations for your commissary operations.
- 4 Monitor and Manage Store Orders**
Integrated with store ordering, commissary users can monitor and manage store orders in real-time, improving the communication between stores and commissaries.
- 5 Recipe Management Solution**
Recipe management provides product cost, data sheets, quality control, regulatory nutrition, and ingredient labels ensures a single source of truth for recipe data in all channels including ecommerce, scales, and other systems.
- 6 Recipe Costing**
Visualize recipe costing by food, labor and packaging while analyzing the effects of margins on price enables retailers to stay informed and adapt to changing costs.
- 7 Monitor and Manage Commissary Operations**
Large scale manufacturing can be complex. The ability to monitor and manage daily operations such as production deadlines, fill rates, and distribution status ensures a smooth and on-time operation.
- 8 Inventory Management**
Track and manage all item inventory including WIP (Work in Progress) items produced on demand or stored in inventory. Accurate inventory provides visibility into potential shortages, minimizing the need to short orders.
- 9 Intelligent Forecasting**
From Store Orders, Production Planning to Commissary Replenishment, AI enhanced fresh demand sensing forecast engine powers workflow automation and data-driven operations. Complex decisions made easy with Fresh AI.
- 10 Commissary Replenishment**
Minimize shrink caused by spoilage and shortening orders due to inventory shortages. CGO (Computer Generated Orders) leverage intelligent forecast to deliver accurate orders for raw materials including food, packaging, and supplies.

Benefits

Be the Best in Fresh with Invafresh:

- 1 Easily scaling your production operations to achieve economies of scale while maintaining quality control and traceability over production.
- 2 Reducing your shrink and ensuring the freshest stock for both your stores and commissary based on maintaining a perpetual inventory of raw ingredients to finished goods.
- 3 Improving your recipe cost management by managing your margin costs through recipe costing and control over defined production processes.
- 4 Enhancing and standardizing your production planning for best-in-class operational efficiency.
- 5 Seamlessly integrate store systems with a grocery centric commissary fulfillment solution. Less complex than multi-industry ERP solutions.
- 6 Full visibility to store demand ensures accurate store allocation and order replenishment.

1 centralized source of recipe truth

100% standardization of recipes

25% reduction in shrink

50% reduction in replenishment time
