Managing inventory for your Fresh operations is critical to improving margins, decreasing shrink, and building customer loyalty. Incorrect fresh item counts due to improper processes can adversely impact store revenues and strategic opportunities for your grocery business.

Relying primarily on manual reports to monitor fresh production performance is prone to error and requires significant labor hours.

Features

1

Track All Inventory Affecting Activity
Track all activity that impacts your product inventory transactions such as Point-of-Sale, "Point-of-Scale", discards, ingredient usage, transfers, reclamation, and conversions.

2

Out of Stock Tracking & Alerting
Track, measure, and receive alerts on your out-of-stock fresh retail and backroom items.

3

Inventory Adjustment Tracking & Reporting
Track your inventory adjustments by item, category, department, or store over time to look for patterns and insight into unknown loss.

4

Auditable Results
Forensically track all financial count activity by user, location, and product as well as all manual corrections with reason.

5

Perform Periodic Financial Counts
Organize and conduct financial counts for all in-store fresh categories and departments, providing you verifiable count results for necessary financial reporting.

6

Corporate Count Progress Dashboard
See the state of any financial count in any store from a store-centric corporate portal.

7

Grand Total Calculator
Generate combined retail and backroom inventory totals at the item level cost, ensuring accuracy by value and not just volume.

8

Interchangeable Product Code Scanning
Interchangeably scan product codes between retail UPCs, backroom SKUs/article numbers or manufacturer product codes and the ability to capture items not on file without interruption to count workflows.
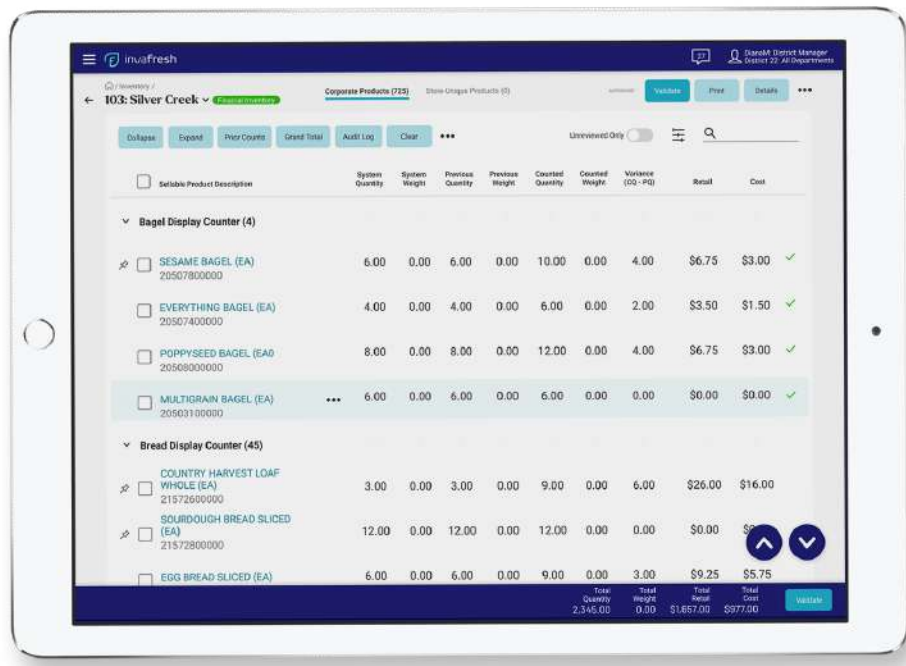

Benefits

Be the Best in Fresh with Invafresh:

1 Empower your employees to take control of inventory management, reducing labor hours required to complete in-store financial counts

2 Improve accuracy of your counts, reducing the number of corrections passed to corporate departments and post-count corrections

3 Eliminate manual reporting, reducing your turnaround time to complete financial results for store operations

4 Enforce and standardize your public corporation financial reporting guidelines

5 Follow public corporation financial reporting guidelines that verify physical inventory corrections are only performed while physically in-store

6 Increase your in-stock of fresh items through better out-of-stock tracking and awareness.

50% reduction of turnaround time for financial reporting

50% reduction of number counting errors

25% reduction in time to complete in-store fresh inventory financial counts

Be the Best in Fresh!

Deployed in more than 25,000 grocery stores across 15 countries, Invafresh is the industry leader of Freshology™ with its cloud-based, AI enhanced, and award-winning Fresh Retail Platform, empowering grocery retailers with omnichannel merchandising, replenishment, and sustainability and compliance. Invafresh's technology has contributed to $150 million annually in waste reduction and is used in $100 million worth of transactions daily.
