**invafresh**

Ordering fresh items for your grocery retail operations is critical to minimize inventory touches while maintaining a consistent in-stock position.
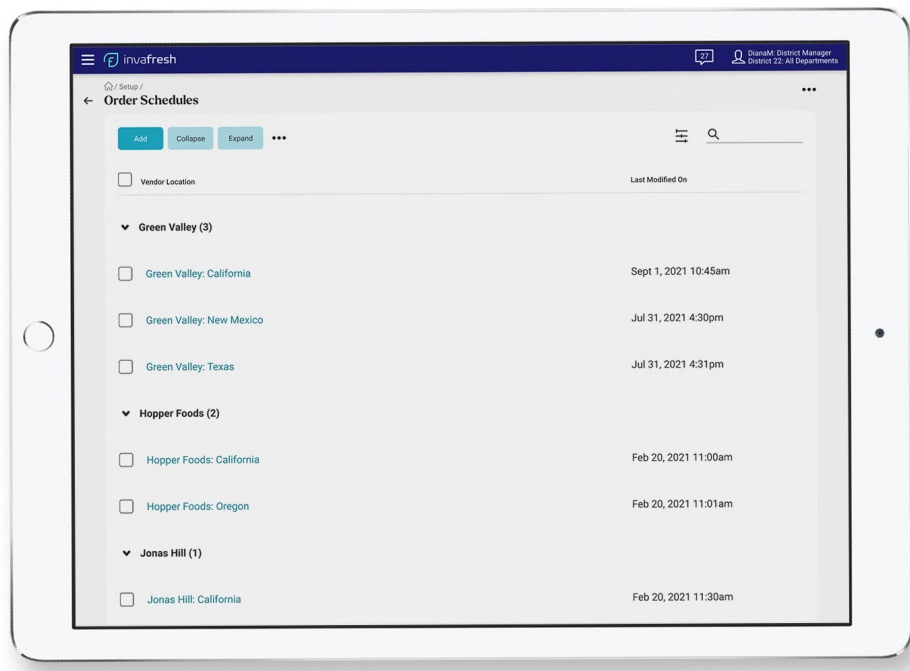

Transform your ordering operations for simplified, sustainable, and measurable best-in-class operational efficiency.

Uncover hidden labor, cost-savings, and reduce waste with the only ordering system capable to handle the unique ability to replenish backroom inventory for all your fresh food categories regardless of how items are sourced, used in fresh production, or sold directly.

# Features

**1 Fresh Intelligent Forecasting**
Accurately forecast your future fresh food backroom requirements based on retail item movement ensuring a single source of truth for assessing long range forecasting.

**2 Recipe Ingredient Ordering**
Generate consolidated replenishment requirements for ingredients used on one or many recipes for your fresh food retail items produced or transformed in-store.

**3 Order Guide Replacement**
Ensure accurate control of what can be ordered at what stores.

**4 Autonomous Order Processing**
Process orders independently of in-store operator approval for more autonomous processes.

**5 Flexible Order & Delivery Schedule Configuration**
Configure and integrate with ordering and delivery schedules with your suppliers, whether they be retailer operated distribution centers or independent direct store suppliers.

**6 Fully Integrated with Inventory Management for Fresh Backroom Items**
Integrate with real-time fresh backroom inventory and balance on-hand quantities, ensuring the most accurate order replenishment recommendations to reduce over or under ordering.

**7 Configurable Order Compliance & Audit Reporting**
Measure the quality of in-store operator performance that aligns with best practices, reinforcing the core principle that "good execution equals good results".

**8 Corporate Visibility into Days of Supply & Allocation**
Track, measure, and receive alerts on days of supply below required levels needed, helping you to ensure high in-stock rates and maximize sales opportunities.

**9 Support for Mobile Devices**
Paperless fresh ordering ensures the most up-to-date information and a platform for timely communication and alerting in-store operators.
